**PRE-APPROVAL IS REQUIRED**

Some people use the terms interchangeably, but there are important differences that every homebuyer should understand. Pre-qualifying is just the first step. It gives you an idea of how large a loan you'll likely qualify for. Pre-approval is the second step, a conditional commitment to actually grant you the mortgage.

The borrower must complete an official mortgage application to get pre-approved, as well as supply the lender with all the necessary documentation to perform an extensive credit and financial background check. The lender will then offer pre-approval up to a specified amount.

**IMPORTANT**

If any amounts described below apply, they are subtracted from the deposit if contract is not completed.

**RENTAL OR RESIDENCE:** Purchasers must advise if Agreement for Purchase and Sale (APS) is to be prepared for the purpose of resident ownership or is intended as a rental property. Any switch to the aforementioned purpose requiring the APS or any other documents to be reproduced before step three above may be subject to \$250 administration fee. Any change to the purpose (residence or rental) after step three (final sale) requires notification in writing no later than 30 days before closing, will be managed as an addendum and also subject to the same administration fee. In both instances the administration fees are non refundable and will be added to closing costs or subtracted from the down payment deposit if the final sale is not executed.

**E-SIGNING BEYOND 2 PURCHASERS:** An administration fee of \$100 per additional purchaser may apply to cover the cost of managing and providing sales documents. The fees, if applicable, are non-refundable and will be added to closing costs or subtracted from the down payment deposit if the final sale is not executed.
